

DHAESHA MYERS

Cloud Engineer · Full-Stack Developer · Infrastructure & Application Delivery

Washington, DC | (202) 860-1957 | dhaesha3000@gmail.com | linkedin.com/in/dhaesha-myers | **U.S. Citizen · Remote-First · Authorized to work in the U.S.**

PROFILE

Cloud-focused software engineer with 5+ years of technical experience spanning cloud infrastructure, full-stack development, and enterprise IT operations. Proven track record deploying serverless applications on AWS, automating CI/CD pipelines, and building React/Next.js interfaces alongside administering identity systems and Zero Trust security for 17,000+ users. Skilled at infrastructure-as-code principles, containerization, troubleshooting complex systems end-to-end, and translating technical concepts into clear documentation. CompTIA A+/Sec+ certified with AWS CCP in progress. Seeking to contribute to teams building and operating cloud-native software at scale.

CORE COMPETENCIES

AWS & Cloud Infrastructure | React, Next.js & TypeScript | CI/CD & GitHub Actions | Docker & Containerization | Infrastructure as Code | Python, Bash, PowerShell | IAM, MFA & Zero Trust Security | Linux & Windows System Administration | REST APIs & Backend-for-Frontend | Technical Documentation & Knowledge Base | Troubleshooting & Root Cause Analysis | Cross-Functional Collaboration

Front-End Developer · DeFi Ours | 2023 — Remote

- Built and deployed a cloud-native SaaS platform using React, Next.js, TypeScript, and serverless AWS infrastructure; implemented automated CI/CD via GitHub Actions and containerized deployments
- Developed reusable UI components, interactive dashboards, and responsive interfaces; optimized frontend performance and cloud resource utilization for reliability and cost efficiency
- Managed AWS compute, storage, and networking configuration through infrastructure-as-code principles; troubleshoot end-to-end issues across the full stack from UI to infrastructure
- Authored technical documentation and operational runbooks to streamline team onboarding, reduce deployment friction, and establish repeatable engineering processes

Help Desk Technician · U.S. Patent & Trademark Office (USPTO) | 2016 – 2018 — Alexandria, VA

- Administered Active Directory, IAM, Group Policy, and MFA for 17,000+ users during enterprise cloud modernization; maintained Zero Trust compliance and strict security protocols
- Supported large-scale migration to cloud-based SaaS collaboration tools; triaged and resolved complex infrastructure, VPN, and endpoint issues via Remedy (BMC) within SLA windows
- Created and maintained operational runbooks, configuration documentation, and knowledge base articles for audit readiness, accountability, and continuous improvement

Help Desk Technician · IC-MARC (Financial Services) | 2018 – 2019 — Washington, DC

- Managed incident lifecycle across hybrid cloud infrastructure (Citrix VM, Oracle, Salesforce SaaS) in ServiceNow; performed root cause analysis to reduce MTTR and improve reliability
- Supported migration of on-premise financial systems to cloud-based SaaS platforms; documented configuration changes and operational procedures for business continuity
- Developed knowledge base articles and user training materials to streamline adoption, close educational gaps, and improve overall system reliability

Tech Support Specialist · U.S. Department of Veterans Affairs | 2021 – 2023 — Remote

- Administered user accounts and access controls for cloud-hosted healthcare SaaS platforms; resolved authentication, MFA, and connectivity issues across web and mobile endpoints
- Documented all troubleshooting steps and resolutions in structured formats for compliance reporting and operational transparency; communicated technical solutions to non-technical stakeholders

TECHNICAL PROJECTS

Cloud Deployment Pipeline · Next.js, Vercel, GitHub Actions, Docker, AWS — Deployed containerized web applications with automated CI/CD, demonstrating infrastructure-as-code, cloud-native serverless workflows, and full-stack development from UI to infrastructure.

EDUCATION & CERTIFICATIONS

Pikesville High School · Pikesville, MD | General Assembly Bootcamp | Certifications: CompTIA A+ (2017–2023) · CompTIA Security+ (2026–2029) · AWS Certified Cloud Practitioner (In Progress)
